Libraries & Frameworks: React, MongoDB, Node.js, Selenium, Bootstrap and OpenCV
Experience with Agile/Scrum software development lifecycle

PROJECTS

All my projects are on my website https://jyotiheer.netlify.app

Baltroc, JavaScript, Python & MongoDB
- Baltroc is a 2D MMORPG cross-platform pixel art adventure game
- The game engine used was Godot
- Try it out http://baltroc.com/

Restaurant management app, Java
- Built using android studio
- Allowed mangers to perform many day-to-day tasks in an easy and simple app
- Automatically made monthly employee schedules with each employee personally preferences

CryptoApp Tracker, Next.js (React.js Library), Scss, Bootstrap
- Executed an API request from CoinGeckoAPI to have access to real time crypto data such as price, volume, and market-cap on each page refresh
- Created a web interface using Component based development along with some Bootstrap templates.

SpaceStagram, React, Js, Html, Css
- This was made for the Shopify intern challenge
- Basically, you needed to make an Instagram knock off and you use the NASA API to get the photos and data
